

## Security with style

# TRUCKMAN

*Quality hard tops for the Škoda Pickup*

# Increase the flexibility of your Škoda

*Truckman Top 'S' model*

*Truckman Top 'C' model*

Having chosen a well-styled and tough pick-up, you won't want to compromise either its good looks or rugged durability when you buy a top to provide security, versatility or that extra weather protection. The Truckman 'S' or 'C' top will match your Škoda Pickup perfectly.

An immense amount of thought goes into the design of all Truckman Tops. Attention to detail, styling, special features, standard of construction and quality of finish, have resulted in Truckman being the undisputed market leader in pick-up tops.

# Pickup

## Versatility

Whether you are a farmer, builder, electrician, small holder or utility fleet operator, whatever your need, no other top can match the Truckman Top for making this pick-up into such a versatile work horse.

- Speedily removed and refitted using four adjustable overcentre catches.
- Tough, sectional-rubber ribbing, bonded across the front and rear of the roof, plus styled-in lashing points (tested to demanding German TÜV standards) means that ladders or evenly distributed loads can be carried on the roof without the need for higher and unsightly bolt-on ladder racks.

Built in ladder rests and lashing points

## Security

More and more customers are buying Truckman Tops for additional security as well as weather protection.

- Robust tailgate with tinted, toughened-glass set in a strong box-section aluminium frame. Sections available separately for ease of repair.
- Heavy duty steel 2-way rod lock, operated by a central locking handle.
- The bottom of the tailgate closes over the tailboard so that the vehicle is secure when the tailgate is locked.
- Also available for added security - an optional steel grille which can be fitted to the inside of the tailgate.

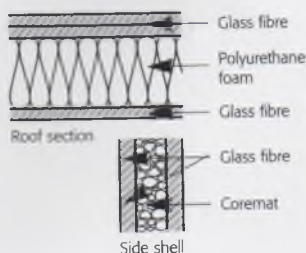

## Strength

When it comes to strength and rigidity, you will find that Truckman Tops are constructed to complement the standards you would expect from Škoda.

- For extra strength and insulation the roof of the 'S' Model has a double skin of glass fibre with a 12mm core of polyurethane foam; plus metal reinforcements at the rear corners.
- Sandwich construction side panels comprising laminated glass fibre plus tough, lightweight Coremat which gives added strength without increasing weight.

### 'S' model construction

## Warranty

The high specification and the quality of workmanship that goes into the construction of each Truckman Top enables us to offer a three-year warranty on our tops.

# Features of the Škoda Pickup

## Standard features - 'C' and 'S' models

- Built-in ladder rests with flush fitting integral lashing points at each corner
- Simple installation
- 3 year warranty
- Robust rear tailgate, with black anodised aluminium box section frame with tinted toughened glass window. Opening assisted by gas struts
- Two way lock with external locking handle for load security
- The only accessory hardtop from a supplier approved by Škoda UK

## Dimensions

Overall height:	1700mm
Internal height:	1185mm
Rear aperture height:	1090mm

## Truckman Top 'C' model

- All white colour impregnated external finish
- Single skin roof with longitudinal stiffening spine moulded into interior of roof
- Roof designed to carry 75kg evenly distributed load
